

ZapPulse 800XE Setup: Single 230V Pancake Trafo, SoftStart & Single-Ended Input

Please note the violet wire connecting the first and last pole of the 15VAC inlet terminal. This is necessary when only a single 15VAC winding is available.

ZapPulse 800XE Setup: 230V Pancake Trafos, SoftStart & Single-Ended Input

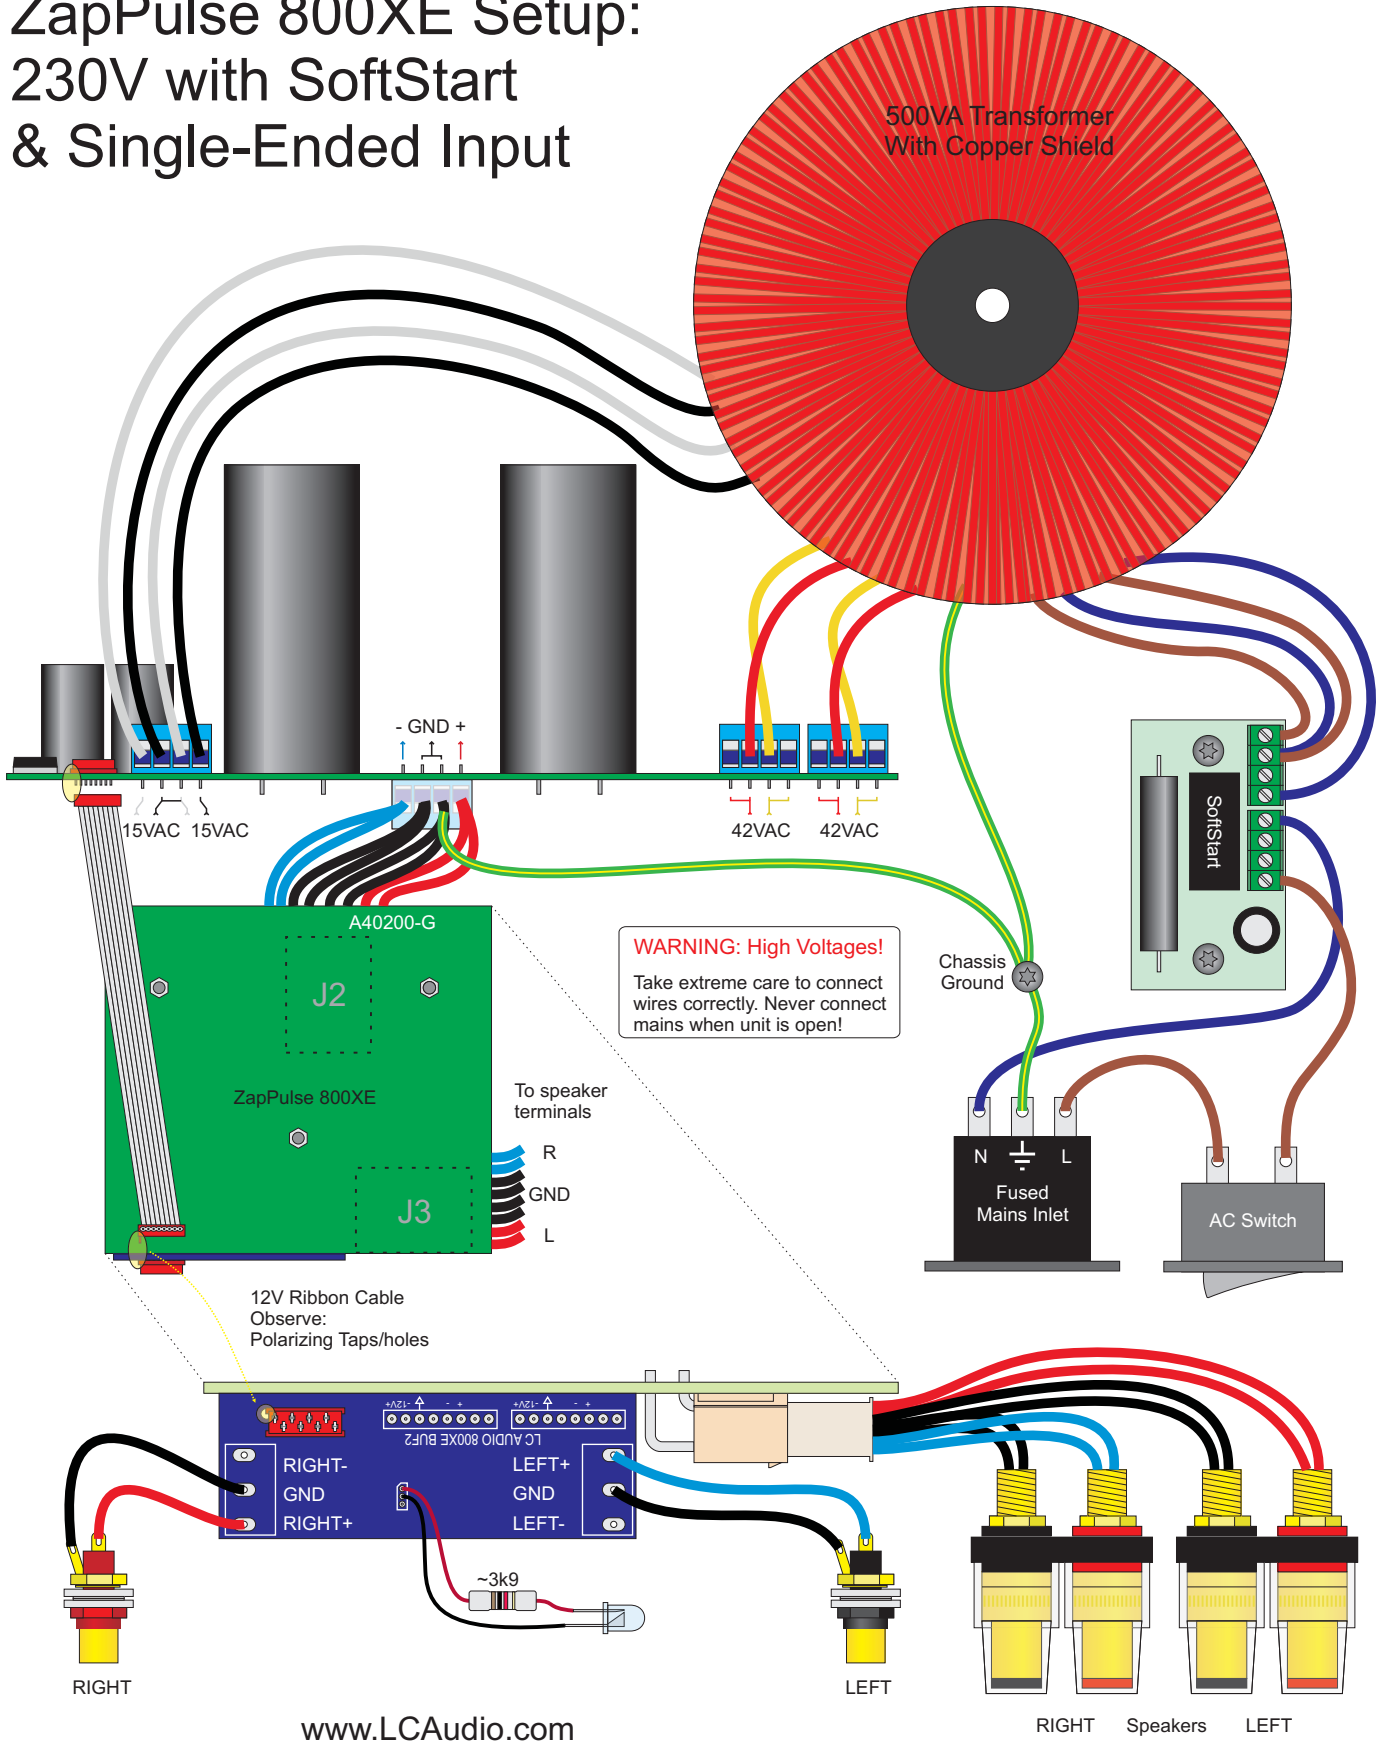

Attention!
Note the sequence of wires out of the trafo: The black dots indicate wires in phase!

WARNING: High Voltages!
Take extreme care to connect wires correctly. Never connect mains when unit is open!

12V Ribbon Cable
